We introduce ourselves as BIS approved, ISO- 9001:2015 registered firm specializing in manufacturing and repair of Distribution Transformers ranging from 10 KVA up to and including 1000 KVA. Geesons Transformers has been repairing and manufacturing Distribution Transformers from as early as 1984. With humble beginnings in 1984 from a small, rented premises in Mathura, we have come a long way and now have dedicated 6500 sq metres of Industrial space (with 8000 sqft of expandable constructed area) at our disposal in Industrial Area, Site A, Mathura (U.P.).

At Geesons, every transformer being repaired or manufactured goes through a series of tests right from raw material stage till finishing stage. All routine tests are carried out as per applicable standards at our in-house testing laboratory. Calibration of all instruments is done at regular intervals from NABL accredited labs.

Our unit is equipped with a modern testing lab, which has precision grade instruments and testing panel to carry out the following tests:

- **Measurement of Winding Resistance**
- **Measurement of Voltage Ratio**
- **Measurement of Load Loss(at 100% load)**
- **Measurement of Load Loss(at 50% load)**
- **Measurement of No Load Loss and Current**
- **Measurement of Insulation Resistance**
- **Separate Source Voltage Withstand Test (HV/LV Test)**
- **Double Voltage Double Frequency Test**
- **Heat Run Test**
- **Air Pressure Test**
- **Vacuum Test**
- **Measurement of Paint Thickness**
- **Measurement of Acoustic Sound Level**

CML-880098321

Our Transformer designs have been successfully type tested (Short Circuit Withstand Test, Lightning Impulse test, Temperature Rise test, Flux Density test, Over Fluxing test etc.) by ERDA, Vadodara. The processes and procedures we follow are as per guidelines of ISO 9001-2015. We have satisfied clients from both private and public sector.

All designing, testing, repairing assembling, and finishing of our products is done by skilled, experienced and well-qualified technical, quality control and supervisory staff. We believe in retaining talent and inclusive growth for our employees and take pride in the fact that we have had a very low rate of attrition since we started out in 1984

At the core of our working, we are defined by these values:-

- **Quality in all processes**
- **Customer Satisfaction**
- **Employee Satisfaction**
- **Inclusive Growth**

Ramanlal Shorawala Group of Industries

Geesons Transformers is a part of the Ramanlal Shorawala Group of Industries, Mathura. The group was started in 1948 by Late Shri Ramanlal Ji Shorawale - An eminent visionary, businessman and philanthropist of the region.

The Group has now grown and has interests in various sectors like Hospitality, Packaging , Education , Imports , Power etc. All units within this group are now being managed by its well educated and qualified third Generation.

The Changing Scenario of Energy Sector in India and Latest Developments

In the yesteryears, it was mainly the State owned distribution companies (discoms) which would directly be responsible for maintaining, upgrading and creating new power and electricity infrastructure for the state. However a lot has changed since the last 5 years or so. The energy distribution infrastructure in the whole nation is being revamped as a top priority in line with the vision of Ministry Of Energy and Additional Sources of Energy. Speed and Efficiency of execution are one of the prime attributes needed. This has resulted in the need for a lot of work to be outsourced to private sector companies by the state discoms in all states of the country. We strive to be a significant part of this Revamped Distribution Infrastructure drive.

Products

Distribution Transformers- 3 Phase
(Up to and including 1000 kVA)

Distribution Transformers- Single Phase
(Up to and including 1000 kVA)

Current Transformers
(All ratings up to 200/10 Amp)

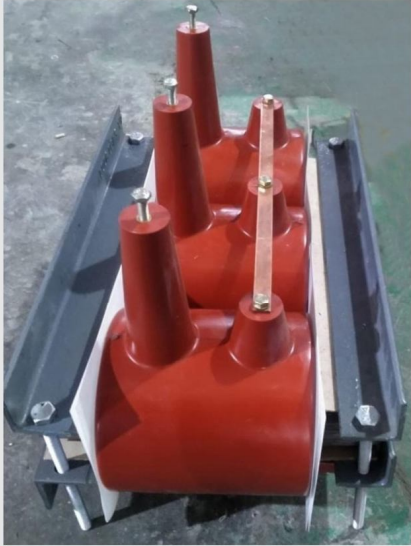

Approved by:

CML-880098321

Products

**Potential Transformers
(11000/110 v)**

**CTPT Pole Unit
(Oil Filled)**
